

Position: QA/QC Specialist

Location: Mumbai Plant

KEY REQUIREMENTS

- Diploma in Engineering
- Expertise in NDT testing
- Precision measurement tools proficiency
- Experience in material quality documentation

ROLES AND RESPONSIBILITIES

- Perform comprehensive Non-Destructive Testing (NDT) to ensure structural integrity of fabricated components.
- Execute rigorous inspection protocols for all raw materials, sub-assemblies, and finished goods.
- Maintain high-precision measurement tools and ensure calibration records are strictly kept.
- Compile and manage detailed quality assurance documentation to maintain industry certification standards.
- Identify, document, and report any non-conformities; oversee the implementation of corrective actions.
- Conduct root-cause analysis on product defects and propose long-term solutions.
- Collaborate with the production team to ensure quality standards are integrated into the manufacturing process.
- Participate in client-side quality audits and prepare required technical documentation.
